Objectives:

Forward-thinking **Information Management** student merging technical expertise with **product vision**.

Seeking to leverage **full-stack development** capabilities to build user-centered solutions while applying analytical skills to **drive product decisions** based on meaningful data insights.

Education:

Bachelor's in information management

Shanker Dev Campus Putalisadak

Technical Skills

- **Languages:** HTML, CSS, JavaScript, PHP, Python, TypeScript
- **Databases:** MySQL, MongoDB, PostgreSQL
- **Frameworks & Libraries:** React, Express, Node.js, Next.js
- **Tools & Technologies:** Git, GitHub, REST APIs, Prisma ORM
- **Additional Tools:** Notion, Jira, Figma, Postman

Projects

LikhitMock

TypeScript-based web application to help users prepare for Nepal's written driving license exam.

- Built with **React** and **Next.js** using **TypeScript**
- Simulates real **Nepal driving license written tests**
- User-friendly UI for practice and revision
- Live Link: <https://likhit-mock.vercel.app/>

Curated Chronicles – Blog Platform

- Developed a modern blog platform using Next.js, TailwindCSS, ShadcnUI, and Prisma ORM
- Includes post creation, editing, and deletion with server-side data handling
- Fully responsive design with clean UI components

- Live Link: vivid-gu87.vercel.app

Chat App

- RESTful backend for a real-time chat application using Node.js, Express, and MongoDB
- React in Frontend
- GitHub: [Chat App Backend](#)

Subscriptorx

- Backend system for managing user subscriptions
- Implements create, update, delete operations with Arcjet-based rate limiting
- GitHub: [Subscriptorx](#)

VideoStore

- Video-sharing platform supporting up to 100MB uploads per video
- Role-based access (Admin and General users), built with Next.js and TypeScript
- GitHub: [VideoStore](#)

Motive:

- **Full-stack development** (React, Node.js, Next.js) with a **product-focused mindset**
- Passionate about building **user-centered solutions** that solve real problems
- Eager to contribute to **cross-functional product teams** and industry projects
- Committed to **data-driven decision making** and iterative product improvement
- Focused on growing **product thinking skills** alongside technical expertise
